

Model Card

model-card:ncd-copd:client-manifest-current:v1

COPD

This model card describes the current client-manifest disease model and its component boundaries for assurance work.

Identity

Model id	01K2RRSCN3A1GPTBHJZE3GZB7M
Composition record	composition:ncd-copd:client-manifest-current:v1
Runtime	2025-2046; synchronous iterations 10
Signature	57df67caa72cd56f02ab9df2672ec02a36a2b6662be5bd118ff8eb729914f7bd
Components	

Component	Mode	Role
Demographic substrate	compiled_together_current_graph	Population substrate
Disease epidemiology core	compiled_together_current_graph	Disease state and transfer mechanics
Burden metrics	compiled_together_current_graph	Healthcare output metrics
Economic metrics	downstream_metric_current_graph	Economic output metrics
Tobacco Risk Factor	link_then_inject_bundle_candidate	Surface to graph boundary
Clinical Inhaled Salbutamol	compiled_together_current_graph	Clinical intervention
Clinical Ipratropium Inhaler	compiled_together_current_graph	Clinical intervention
Clinical Oral Prednisolone	compiled_together_current_graph	Clinical intervention

Limits

The card describes the current executable disease model and component records. Most components are current in-graph boundaries, not independently executable modules yet. The demographic model is not included in this disease-model assurance registry.
