

Run Certificate

run-certificate:ncd-copd:all-scenarios-default-20260602b:v1

COPD Run Certificate

This certificate records the scenario-country runs present in the source validation-run JSON. It is runtime execution evidence, not a claim that the model agrees with OneHealth Tool, Spectrum, or any other external comparator.

Run Identity

Status	pass
Run id	all-scenarios-default-20260602b
Model card	model-card:ncd-copd:client-manifest-current:v1
Scenario scope	all
Country scope	default
Rows certified	28
Status definition	pass means the Rust runner exited successfully and emitted result rows for the scenario-country run
Generated file retention	temporary materialised models, data bundles, and result CSVs are discarded after hashing and headline extraction
Source run file	65c637e60967e15878c9a8df7fb5748936c7465d0a9f0be25c0345320e84902d
Source run semantic	9255bc6b6fd10c7035ff6f7e509dfa34ece9a6cf87a12c93bdacf40a017ea946
Certificate	6f4f92a8406991fc89297759c4c3c4ba2dc5f57098788028e2c1c25cb8f52e43

Reference Headline Figures

Metric	2025	2030	2040	2046
Population at risk	133.30m	149.49m	182.07m	201.58m
COPD prevalence state	960.3k	1.14m	1.57m	1.88m
COPD incidence flow	61.1k	72.1k	99.2k	119.3k
COPD mortality flow	11.5k	14.6k	21.9k	27.7k
Years lived with disability	333.8k	398.3k	557.1k	674.7k
Years of life lost	330.0k	386.0k	515.6k	608.9k
Healthy years lived	115.25m	129.19m	156.97m	173.41m

Warnings

This certificate records runtime execution evidence only. It does not compare model outputs with OneHealth Tool, Spectrum, Appendix 3 reference outputs, or another external comparator. Generated data bundles are identified by hashes in the run JSON, but the hosted unified API/datafetcher source version that produced them is not pinned in this certificate.
